

Project Initialization and Planning Phase

Date	15 March 2024
Team ID	SWTID-2026-6707
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The traditional credit card approval process is time-consuming and prone to human error due to manual verification. Our Credit Card Approval Prediction System uses Machine Learning to analyze applicant details and predict whether the application should be Accepted or Rejected, providing faster, more accurate, and reliable decisions.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer applying for a credit card..	Get my credit card application approved quickly and easily.	The approval process takes time.	My income, employment, family details, and credit history must be verified before approval..	A nxious and uncertain about whether my application will be accepted or rejected.
